

Scan to open — then install below

This is not an App Store or Play Store download — it is a web page you add to your home screen. It then opens full-screen like an app and works offline once loaded: every rule and photo stored on your device.

iPhone / iPad

must use the Safari browser

1. Open Safari and go to the address above (or scan the QR code).
2. Tap Share (square with an up arrow) — bottom toolbar on iPhone; top-right next to the address bar on iPad.
3. Find “Add to Home Screen”. Don’t see it? Scroll down, or tap “View More” to reveal it.
4. Leave “Open as Web App” switched on (the default), then tap Add (top-right).

The option only exists in Safari, and often sits further down the Share sheet — keep scrolling.

Android phone / tablet

use the Chrome browser

1. Open Chrome and go to the address above (or scan the QR code).
2. If an “Install app” banner appears, tap it — done. Otherwise continue.
3. Tap the three-dot menu (top right).
4. Tap “Add to Home screen” or “Install app”, then confirm.

Samsung Internet works too — look for Add page to > Home screen.

First launch

Stay on Wi-Fi for a minute on first use while the rule images download in the background. From then on it works fully offline — even with no signal at the arena.

Updates take care of themselves

When anything changes, the app shows “New version available — tap to update”. One tap and you’re current.

What's inside

Equipment — searchable permitted / prohibited / conditional gear with photos. Equipment Rules — the rule text. Dressage Tests — EA, Young Horse and FEI test sheets. Dressage Rulebook — the official National Dressage Rules. (Tests and Rulebook open on the EA website, so those two need an internet connection.)
